Natasha's Law. We sell edible gifts alongside our flowers. Every pre-packed edible item carries full ingredient labelling with the 14 regulated allergens emphasised in bold, in line with Natasha's Law (UK PPDS regulations). Ask any member of staff for the allergen folder kept behind the counter.

Flowers themselves are not food. Some stems — lily, daffodil, hyacinth, euphorbia — are irritant or toxic if eaten, and lilies are dangerous to cats. Tell us about hay fever, pollen or fragrance sensitivities when you order and we will build from our low-pollen, fragrance-free list.
